[NEW]

The Renoma Apartment, in Cristobal's eyes

In the heart of the 16th arrondissement of Paris, above the historic Maison Renoma store, the Appart is a new 220m2 space of artistic emulation, which aims to welcome art in all its seams, in an intimate atmosphere.

It opens its doors to Cristobal's comical vision, which makes us think about our life, our relationships, our consumption, playing on the contrast between a bourgeois, classic apartment and the gallery of the absurd that he houses.
